POWER PLANT MAINTENANCE
SELECTION SYSTEM

--MASS TEST BATTERY--

Test #5105

Human Resources
Performance Assessment Services
Southern California Edison International
An Edison International Company
Introduction

MASS is a group of 5 short aptitude tests designed and validated to aid in the selection of candidates for electric utility industry operations and maintenance occupations. Some of the job titles covered by the validation study include Mechanic, Machinist, Electrician, Welder, Pipefitter, Steelworker, Rigger, Instrument and Control Repairer, Helper, Painter, and Insulation worker.

Test Scheduling

Employees will be scheduled for testing by their Supervisor through Human Resources. Applicants will be scheduled through an SCE recruiter.

Test Session

It is important that you follow the directions of the Test Administrator exactly. If you have any questions about the testing session, be sure to ask the Test Administrator before testing begins. During testing, you may not leave the room, talk, smoke, eat, or drink. Since some tests take several hours, you should consider these factors before the test begins.

Your answers to the questions are multiple-choice and will be read by a scanner. For your answers to be read accurately by the scanner, you must fill in the circles completely and erase completely any answer you wish to change.

Expect to be at the testing session for approximately 2 hours. No study aids are allowed when taking this test.

Info Guide Feedback

At the end of this guide you have been provided with a Feedback page. If a procedure or policy has changed, making any part of this guide incorrect, your feedback would be appreciated so that corrections can be made.
To help you prepare for this test, Edison Electric Institute, the test developer, has prepared an informational brochure and detailed practice tests. We recommend that you read through all practice tests and the brochure. The materials are online, and are accessible from any computer with internet access. From the websites you may read or print the materials.

*NOTE: Pop-up blockers may not allow the website to run correctly. If you use Pop-up blockers, it is recommended that they be turned off prior to accessing the site.

1. From any computer with internet access, type http://www.eei.org/practicetests in the address bar to access the practice tests, or http://www.eei.org/testingbrochures to access the test brochure. Type the above address(es) exactly as written.

2. Both sites require the same username and password, assigned to Southern California Edison. To log in to the sites, enter the following information (case sensitive).
   Name: paper
   Password: pen

Example:
3. Click on “Power Plant Maintenance” (found on the left hand side of the webpage). From there you will be able to access the specific practice test modules or test brochure. You may print the documents if you wish.

Example:

```latex

\end{tabular}
\end{table}
```

The Power Plant Maintenance Positions Selection System (MASS) is a battery of skill and ability tests designed and validated to aid in the selection of candidates for power plant maintenance positions. This test battery measures the mental abilities found to be important for successful job performance.

We recommend that you set aside a continuous 2-hour segment of time so you are able to complete all the practice tests in one sitting. Keep track of your time – record starting and ending times so that you know how long you take to complete the practice tests. It may be valuable to have a clock or timer that you can glance at while you are taking a practice test to help pace yourself based on the suggested times in the individual practice test directions.

Once you complete the practice test battery, it is important to review your performance. Here are a few points to consider:

1. Did you exceed the time allotted for a test?
2. Were any of the mistakes you made the result of making hasty decisions?
3. Were there questions that you skipped, but in hindsight you could have answered?
4. Did the time you spent reading directions take away from the time you spent on a test?

When you load a document (e.g., a practice test) it will replace any document you may have already loaded. If you intend to print a document, you should do so before loading a new document.

You can print documents by clicking on the “Print this document” link found near the top of the document. You can also print by clicking anywhere on the document using your right-mouse button and selecting “Print” from the menu that appears. If the “Print” option does not appear in the menu, press the Ctrl and P keys simultaneously.

To load a MASS practice test, click on one of the links below.

Troubleshooting Guide to Frequently Experienced Problems

- Pop-up blockers may interfere with your ability to access the study materials and practice tests. If you have pop-up blocker software installed, you may need to temporarily disable it. Contact your Internet Service Provider (America Online – AOL, Earthlink, MSN, Verizon Online, etc).

- Anti-virus software (Norton Antivirus, Symantec, etc) may interfere with your ability to access the materials. If you are experiencing problems, you may want to consider temporarily adjusting the settings on your anti-virus software.

- If you experience an error message, such as “Internal Server Error,” simply close your browser window, wait a few minutes, and try again.

- If you are still having problems, please call EEI at the help number listed on the website.
INFO GUIDE FEEDBACK

Please use this page to notify us of any changes in policies, procedures, or materials affecting this guide. Or feel free to contact us regarding the general usefulness of the materials. Once completed, return to:
