## **Request for Letter of Support or Commitment**

### **REQUEST FOR LETTER OF SUPPORT / COMMITMENT**

SCE is pleased to review project ideas and provide letters of support or commitment (as appropriate) to third-parties as part of a California Energy Commission EPIC proposal requirement. Requests can be submitted via email to [collaborations@sce.com](mailto:collaborations@sce.com).

#### **Instructions**

To facilitate timely processing of such requests, please complete the attached intake form. Provide your SCE point-of-contact information, your company information, and relevant information about the proposal. It is essential that you describe whether you are requesting a letter of support or a letter of commitment (a letter of support offers encouragement and shows interest in the project; whereas, a letter of commitment provides financial or in-kind support, e.g., labor, data, utility assets). You may also attach a draft sample letter, a project summary or abstract, and a link to the proposal as reference.

#### **Timing**

SCE requires two weeks advanced notice to become properly informed about the project, assess its potential for success, and determine whether to support and/or commit financial or other resources to the effort. While SCE will make reasonable efforts to accommodate requests submitted outside the stated timeframe, there is no guarantee that SCE will meet the requestor's deadline.

#### **Contact**

If you have any questions, please discuss with your SCE point-of-contact and send an email to [collaborations@sce.com](mailto:collaborations@sce.com).
