

Levon Atarian

Foreman, Electric Vehicle Technical Center
Southern California Edison

Levon Atarian joined Southern California Edison's Transportation Services department in 2002 as an Automotive Attendant responsible for fueling the utility's service vehicle fleet. Within two months he was promoted to Serviceman, then to Mechanic. In 2007 Atarian was given responsibility for managing the entire maintenance facility.

Subsequently, Atarian was offered his current position - Day Garage Foreman at Edison's Electric Vehicle Technical Center in Pomona, CA – including responsibility for overseeing the repair and maintenance of Edison's electrical vehicle fleet, plug-in hybrids and hydrogen fuel cells.

Prior to joining Edison, he ran a family automobile repair shop.

Atarian holds a Bachelor of Science degree in Biological Sciences from California Statue University, Fullerton, and is the father of a six-year-old son.
