## Request for Letter of Support or Commitment

### REQUEST FOR LETTER OF SUPPORT / COMMITMENT

SCE is pleased to review project ideas and provide letters of support or commitment (as appropriate) to third-parties as part of a California Energy Commission EPIC proposal requirement.

#### Instructions

Please visit [sceideas.com](http://sceideas.com) and click on “Submit your idea” to complete an online form. Provide your contact information, details about the proposal, and include any necessary attachments such as a project summary or abstract, [draft sample letter](#), and a link to the proposal. Please also be sure to indicate when you need a response by, your SCE point-of-contact, and describe whether you are requesting a letter of support or a letter of commitment (a letter of support offers encouragement and shows interest in the project; whereas, a letter of commitment provides financial or in-kind support, e.g., labor, data, utility assets).

#### Timing

SCE requires two weeks advanced notice to become properly informed about the project, assess its potential for success, and determine whether to support and/or commit financial or other resources to the effort. While SCE will make reasonable efforts to accommodate requests submitted outside the stated timeframe, there is no guarantee that SCE will meet the requestor’s deadline.

#### Contact

If you have any questions, please discuss with your SCE point-of-contact or send an email to [ideas@sce.com](mailto:ideas@sce.com).
